

PORTFOLIO & DIGITAL PRESENCE TRAINING PROGRAMME

Welcome

You have done the certifications. Now it is time to make that work visible.

Over 10 one-hour sessions, you will build a live portfolio with real, linkable projects — a SQL analysis, a Power BI dashboard, a professional website, and a LinkedIn profile that works while you sleep. By the final session, you will have everything a banking or data analytics employer needs to say yes.

One rule: every session ends with something built. No session is pure theory.

What You Will Walk Away With

- ✓ A live portfolio website with a real URL you can put on your CV
- ✓ A SQL project published on GitHub — complete with business context and key findings
- ✓ A Power BI dashboard published online, with a shareable link and a Loom walkthrough video
- ✓ A LinkedIn profile that is 100% complete, with your projects in the Featured section
- ✓ A polished, ATS-friendly CV with your portfolio URL in the header

#	Session	What Happens	You Leave With
1	Brand, Strategy & Site Skeleton	Define your personal brand. Choose your dataset. Launch your portfolio site.	Live portfolio URL + brand statement

2	SQL Project — Build	Write 4–5 banking business queries with annotations. Set up your GitHub repo.	Annotated queries committed to GitHub
3	SQL Project — Publish	Write your README case study. Polish your GitHub profile. Add the project to your site.	SQL project live and linked
4	Power BI — Build	Build your banking dashboard: KPI cards, trends, segmentation, slicers.	Core dashboard complete in Desktop
5	Power BI — Publish	Publish to Power BI Service.	Dashboard link + Loom video live
6	Portfolio Website — Complete	Write project case studies. Complete About and Skills. Mobile-test everything.	Full portfolio site live
7	LinkedIn — Full Optimisation	Headline, About, Experience, Featured section, first post drafted.	LinkedIn 100% complete
8	CV, Cover Letter & Outreach	Build ATS-friendly CV. Write cover letter framework. Draft recruiter outreach messages.	CV + outreach templates ready
9	Review, Polish & Launch	Audit every link. Trainer review. Post on LinkedIn. Leave with a 30-day plan.	Everything live. Job search begins.

Before We Start — Your Pre-Work

Please complete the following before Session 1. Each item takes less than 15 minutes.

☐ **Create a GitHub account**

github.com — free. Use your real name as the username.

☐ **Create a free Loom account**

loom.com — free tier is enough.

☐ **Create a Power BI Service account**

app.powerbi.com — sign in with a Microsoft or work/school email (free).

☐ **Download Power BI Desktop**

microsoft.com/en-us/power-bi/downloads — free.

☐ **Download your dataset**

Go to Kaggle, search 'Bank Customer Churn', download the CSV. Create a free Kaggle account if needed.

☐ **Bring a professional photo**

A clear headshot — for LinkedIn and your portfolio. Phone camera is fine.

Tools We Will Use

Tool	Used For	Cost
SQL Server	Banking data analysis project	Free
Power BI Desktop	Banking dashboard build	Free
Power BI Service	Publishing dashboard online	Free (public embed)
GitHub	SQL project hosting + portfolio	Free
GitHub Pages or Carrd	Portfolio website	Free
LinkedIn	Professional presence + outreach	Free
Canva	LinkedIn banner + profile visuals	Free tier

The One Rule

If it has no shareable link, it does not go in the portfolio.

Every project we build will be published online. Every session ends with something tangible.
